The Crisis in Financial Advisor Prospecting

The wealth management industry is hemorrhaging billions annually on prospecting methods that fail 97% of the time.

The Missing Piece

McKinsey identifies the crisis and recommends AI-enabled productivity gains. But their solutions assume advisors have QUALIFIED PROSPECTS to work with.

They don't solve:

- How to identify high-probability prospects
- How to understand psychological compatibility
- How to personalize communication

RainMaker is the productivity solution McKinsey called for — delivering 10x improvement in prospecting effectiveness.

The Solution: Two Pathways, One Platform

Combining Jungian psychology, AI research, and 40+ years of domain expertise to match advisors with psychologically compatible prospects.

HUNTER

Intelligent Outbound Prospecting

For advisors seeking rapid growth — especially new advisors without established networks.

- Derive psychological profile from prospect's public data
- Compare prospect archetype against FA profile
- AI-scored alignment before any outreach
- Personality-adapted message generation
- Multi-touch campaign management

GATHERER

Prospect & Client Analysis

Analyze specific individuals or understand why current clients work with you — then find more like them.

- Deep-profile any named prospect or client
- Understand why existing clients chose you
- Identify look-alike prospects from client base
- Relationship mapping & connection strength scoring
- Warm introduction optimization & timing

How It Works: Psychological Intelligence

1

Profile the Advisor

13-question assessment maps advisor across 12 Jungian archetypes with 94% accuracy

2

Discover Prospects

AI-powered research aggregates LinkedIn, public signals, funding events, and life changes

3

Score Alignment

Proprietary algorithm scores 0-100 across 144 personality pairings between advisor and prospect

4

Generate Outreach

Personality-adapted messaging tailored to recipient psychology and communication style

Integrated Training & Coaching Platform

Training integration was always on our roadmap. We realized the same archetype analysis that powers prospecting also reveals how each advisor learns best — so we divided our training across all 12 archetypes.

42GB Training Corpus

- 540+ modules across 12 archetypes
- Video, audio, written content
- 40 years of proven methodology
- Personalized learning paths per archetype

Archetype-Based Learning

- Each archetype learns differently
- AI identifies optimal learning style
- On-demand coaching at point of sale
- Gary's avatar delivers guidance

CRM-Embedded Delivery

- Salesforce sidebar integration
- Contextual coaching per prospect
- Pre-cached top 300 scenarios
- Sub-10 second response target

Enterprise revenue potential: $200–300/seat/month for integrated prospecting + training — up from $99–197 for prospecting alone.

Category Creation, Not Competition

Competitor	Their Model	Critical Gap	Our Advantage
Salesforce	Generic CRM	No FA focus, no psychology	Purpose-built for advisors
SmartAsset	Lead generation	No qualification or matching	AI compatibility scoring
Apollo.io	B2B database	Generic outreach, no profiling	Personalized messaging
HubSpot	Marketing automation	No psychological intelligence	Jungian archetype profiling
FINNY	Data-as-a-service leads	Leads go anywhere, no FA alignment	Archetype-matched, advisor-aligned

Patent-Pending: 132 claims filed | 144 archetype pairings | 40+ years domain expertise embedded in algorithms

Why Competitors Can't Replicate

Patent Protection: 132 claims, zero prior art, continuations planned

Data Moat: Proprietary scoring improves with each interaction

Domain Lock-in: 40 years of FA knowledge can't be reverse-engineered

Intellectual Property & Defensibility

What's Protected

US Patent Filed: Aug 25, 2025

132 Claims Covering:

- Dual Hunter/Gatherer pathways
- 12-archetype advisor profiling
- Profession-based targeting
- Compatibility scoring (0-100)
- Styled message generation
- Public-signal enrichment

Why It's Non-Obvious

Novel Integration:

Prior art has personality analysis OR lead scoring OR messaging — not the integrated FA workflow.

Unexpected Results:

25-40% response rates vs. 2-3% industry standard = 10x improvement.

Long-Felt Need:

97% failure for decades. If obvious, someone would have solved it.
